- Many people prefer social media to communicate **instead** of meeting in person.
- Children need to have a/an **adequate** amount of sleep to stay active and healthy.

B- Reading Comprehension (16 Marks)

16

Read the following passage carefully, then answer the questions that follow:

Water is the most important liquid we know. It is everywhere we look. It is in the ground and in the air we breathe. All animals, plants and humans need water to live. The human body is made up largely of water. Up to 75% of our body is water. Although we can live without food for a few weeks, we would die within a few days without water. The human body needs about 2 to 3 litres of water a day to survive.

How much of our planet is made up of water? Most of the world's water, about 97% is saltwater in the oceans. Only 3% is the freshwater in lakes, rivers and glaciers. Not all water is safe to drink or use. Some need to be cleaned. Drinkable water that is free of germs and chemicals is called **potable** water.

Water has been important for people for thousands of years. We use water in our houses for cooking, bathing and washing dishes. Countries with many mountains and rivers use the power of water to make **their** own electricity.

As the population of the Earth grows, we have to be more careful about how much water we use. There are many simple things you can do to save water. Just by turning the water off while brushing your teeth, you can save up to 200 gallons of water a month. When washing a car or a bike, fill a bucket instead of running the hose. Take action and save Earth's water.

a) **Choose the correct answer from a, b, c and d: (6 x 2 = 12 Marks)**

9. What is the main idea of the 1st paragraph?
- Earth is made up of water.
 - Water has been used for many things for years.
 - The number of people living in the world is getting higher.
 - Water is everywhere, and without it, there would be no life on earth.**
