7. In summer, some people **preserve** some kinds of food by freezing.

8. You have to organise your webpage **neatly** and make it more attractive.

**B: Reading Comprehension ( 16 Marks )**

**Read the following text carefully then answer the questions below:**

Water is the most important source of life on Earth. We can't live without it. Without water we would die of thirst. Three - quarters of the planet is covered by water. Most water is in oceans, seas and rivers. Water is frozen and forms ice caps at the North and South poles because it's very cold there. Then, it turns back to be fresh water when it melts in summer.

Water goes round in a **process** called the water cycle. Clouds in the sky contain water as a gas-water called vapour. This gas becomes liquid and falls to Earth as rain or snow. The rain brings water to seas, rivers and lakes. Water also goes into the soil then plants take it.

You need water to stay alive. Your body loses water when you breathe or sweat. You can stay for more than a week without food, but if you stay without water for three or four days you may die. Plants need water to live. We have to use water carefully. We should also use water wisely so that there will be enough of **it** left for our future life.

**A) Choose the correct answer from a, b, c and d : ( 6X2=12 )**

9. The best title for the passage is:

- a. The North Pole
- b. **Water in Our Life**
- c. Our Future Life
- d. Water in the Ice Caps
