7. I am going to studybecause I am interested in reading books.
8. Last year, heavy rain resulted in a/anthat damaged many streets.

B. Reading comprehension (16 Marks)

16

Read the following passage carefully, then answer the questions below:

The space on Earth for trash to be buried is getting less every day. Yet, we produce more trash and waste that affect the natural environment negatively. What can we do in this case? Recycling is an answer, as we can recycle some of the waste and trash or reuse some unwanted objects.

Recycling helps the Earth in so many ways. It saves space in trash dumps where trash is collected to be burned. Most of things used daily are made of paper, metal aluminum, glass and plastic, all which can be recycled to **reduce** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same goes with glass bottles. Recycling does not take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources, such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

From a, b, c and d, choose the correct answer: (6 x 2 =12 Marks)

9. The best title for the passage is:

- a. Our Environment
- b. Making Paper
- c. Plastic Materials
- d. Recycling

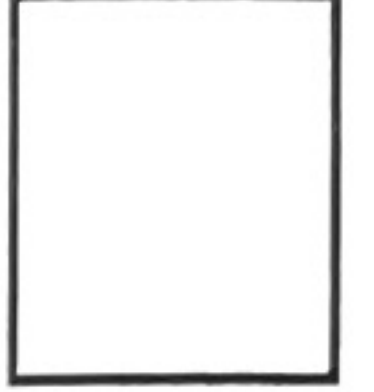

10. The underlined word “**reduce**” in the 2nd paragraph means:
- help
 - lower
 - use
 - improve
11. The underlined pronoun “**it**” in the 3rd paragraph refers to:
- energy
 - time
 - fuel
 - recycling
12. According to the passage, plastic is called the wood of the future because:
- it’s a natural material.
 - it helps save money.
 - it is strong and lasts for years.
 - it cannot be melted down.
13. According to the passage, **one** of the following statements is **NOT TRUE**:
- All trash and waste can be recycled.
 - Harsh weather doesn’t affect plastic.
 - Recycling takes less energy.
 - Glass and metal can be recycled.
14. The purpose of the writer in this passage is to:
- show that all materials on earth are useful.
 - explain that planting trees helps in recycling.
 - tell us that recycling is a good way to use trash.
 - describe how steel and aluminum can be recycled.
